About Armor Guard SS316 Coil Coating

Fast Facts

- 2 Mil layer thickness (50 micron)
- 3 Day processing time
- Excellent chemical and UV resistance
- Warranty: 5 Year standard, 10 year extended
- Repairable
- Cost competitive
- Metallic gray color
- Water reducible acrylic emulsion with 316 stainless steel flakes
- Please contact Jennifer Keith at j.keith@fldist.com for more information

SPOTLIGHT PRODUCT OF THE MONTH

Design Enhancement Center

Florida Air Conditioning Distributors announces the launch of its new "Design Enhancement Center", a company-owned, on site, engineering modification center based in Orlando.

The DEC offers owners, engineers and contractors the ability to modify an HVAC unit to meet the challenges of any project while maintaining the unit warranty.

Modifications include but are not limited to the following: 1) Evaporator and condenser coil coatings, 2) UV light installation, 3) Anti-microbial coatings on fans, 4) High efficiency filter installation, 5) Double wall supply plenum, 6) Exterior

cabinet coatings, 7) Hot gas reheat coils and 8) Rawal device installations.

Again, the above is a partial list of the modifications available through the DEC.

There will soon be a demo unit with some of the modifications listed above available for your viewing pleasure. Check it out!

Don't let those challenging projects frustrate you. FACD and the DEC are here to assist you with anything that comes your way.

Please contact Jennifer Keith at FACD for selections, budget pricing, etc.

"DESIGN ENHANCEMENT CENTER" NOW OPEN!

- Company-owned
- Located in Orlando
- York-authorized
- Variety of modifications available

On The Horizon...New YORK Products and Resources

- REVIT MEP files are now available for York rooftops, 3 to 12.5 tons, with all accessories. If you are currently using REVIT, please contact Jennifer Keith for more information on this time-saving tool.
- The NEW York HORIZONTAL DISCHARGE condensing unit is now available! It is available up to 15.5 SEER and has a microchannel condensing coil.
- York MagnaDRY reheat, available on DX packaged units, offers the ability to remove moisture without increasing sensible cooling in the comfort zone. Available in 3 – 25 ton units.
- The ECO2 YPAL is the newest addition to the comprehensive line of packaged rooftop units. Available in 50, 55, 60 and 65 tons, and contains R410a refrigerant.
- NEW! The York Commercial Comfort System (YCCS) provides the availability to control up to 24 packaged units on one system. Equipment controllers can be factory mounted and are self-commissioning. A cost-effective, simple way to provide innovative building controls for your facility.

Upcoming Events and Reminders

- September 3 - 5

YORK DX Factory trip scheduled to Norman, Oklahoma and Wichita, Kansas. This is a very informative trip, and is time well-spent.

WE'RE HERE TO ASSIST YOU...

Please visit our website at www.fldist.com for a complete list of the manufacturers we represent.

Various tools and software programs are available on our engineering website at www.fldist-eng.com.

Please contact FACD for catalogs, cd's, software programs, presentations, or any items that may assist you with your projects.
